

ULTI COIN ONEPAGER

THE INTRO

ULTI Coin is a new cryptocurrency (ERC-20 Token) that implements and manages in-game virtual currency. Purpose of ULTI Coin is changing in-game currency into ULTI Tokens, which allows gamers to become users of our coin, and change ULTI Tokens into fiat currency or any other in-game currency.

The first "Real money" in-game currency

We want to allow people to exchange their in-game currency (gold, diamonds, tokens etc.) for real money. Any game that you play, already gives you a currency of its own.

This is first cryptocurrency that will allow you to exchange it for fiat values (\$, €, £...) or other in-game currency. That means you will be able to exchange currency from one game, to currency from another.

ULTI & GAME INDUSTRY

ULTI is an open source platform made for gamers and game companies. There are billions of dollars trapped in video-games. By using our coin we can finally unlock that "long forgotten treasure". Everyone gets their "piece of the cake". Gamers will finally be able to access their well earned money.

ULTI IN-GAME APPLICATION

We are currently working on smart contract application that will allow you to use our coin in games. Super easy to use, powered by blockchain, encrypted and safe!

Companies that we strive for:

Allocation

Only 225.000.000 ULTI coins are made, and no more will ever be created. In presale there will be 18.000.000 tokens by 0.12 \$ which is half price of regular initial coin offering price. We are obligated that if we do not make soft cap (2.160.000 \$), which is 8 percent of the whole token sale, we return investors their share. Presale will last for six months, and company keeps right to prolong sale time up to eight months under the circumstances of unforeseen technical issues.

Funding Allocation

- 50% - Development
- 28% - Marketing & Growth
- 10% - Security
- 5% - Infrastructure & Hosting
- 5% - Legal
- 2% - Unforeseen costs
